# ALTERNATE COVERING – GREEN URETHANE FOAM

Designing equipment to perform in challenging environments calls for belt coverings that are up to the task. For a wide range of applications detrimental to rubber coatings, Apache offers the FSTF light green urethane foam covering.

FSTF green urethane foam is created to coat and back flat belts, timing belts and v-profiles. Features include:

- ▶ Belt surface with high grip properties
- ▶ Excellent abrasion resistance
- ▶ Soft, yet durable coating
- ▶ Non-marking to the items being conveyed

Because the coating is made of urethane, we can heat-weld this product to the base belt and help you sidestep the higher production costs of chemical bonding.

If your system is subjected to conditions beyond the limitations of rubber belt coverings, call Apache to meet your needs. A softer, green urethane cover may help convey more green to your bottom line!

PRODUCT	PART#	MATERIAL	HARDNESS	THICKNESS (MM)	WIDTHS UP TO (MM)
FSTF	0066	Green Urethane Foam	N/A	4, 6, 8, 10, 12, 14	160
FSTF-Sticky Top	0067	Green Urethane	Top – 60A	4	60
