

# HEAVY-DUTY BELTING FOR AGGREGATE & MINING

For aggregate and mining applications, you need products that will withstand abuse and demanding conditions.

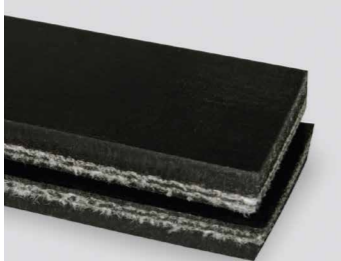

Apache offers the following heavy-duty belt specifications for rugged applications:

## **2-PLY 400# 5/16 X 1/16 GRADE 2**

**Spec#:** 15

**Part#:** 20017538

**Features/Benefits:** A popular heavy-duty belt, particularly in confined spaces with limited clearances. This belt is an excellent replacement for a 3-ply 330#. It can wrap a smaller diameter head pulley, but provides a heavier top cover, greater strength, and greater durability.

## **1-PLY 440# 1/4 X 1/8 GRADE 1**

**Spec#:** 246A

**Part#:** 20029850

**Features/Benefits:** A straight warp, synthetic carcass that offers exceptional life. Features low stretch and high load carrying capacity. Grade 1 covers withstand high impact, tearing, and gouging. (This belt replaces existing spec# PP246, which has RMA Grade 2 covers.)

## **3-PLY 600# 3/8 X 3/32 GRADE 1**

**Spec#:** 14B

**Part#:** 20241012

**Features/Benefits:** Offers durability and load support for wide belts with 3-ply of 200# fabric. High tension belt for handling heavy material, higher tonnages and large lump sizes. Extra-thick Grade 1 covers withstand high impact, as well as resistance to tearing and gouging from sharp/heavy material. (This belt replaces existing spec# 14A, which has RMA Grade 2 covers.)

We provide the right solutions for your application. Call us today!
